

fluimac[®]
pump solution

Special Pumps

Drum Phoenix

PUMPS

DP18 - DP30 - DP50
DP65 - DP100
DP160

MAIN APPLICATIONS

- Chemical industry
- Waste disposal technology
- Automotive industry
- Food industry

Technical data

DRUM PHOENIX are designed for emptying drums and containers, and provide an economical and wear resistant alternative to other pumping systems. In order to handle a wide range of fluids, DP pumps are available in all materials. The pump can be quickly and easily mounted on the drum with its feet. The drum will be completely emptied with a suction pipe.

pump solution

Special Pumps

Twin Phoenix

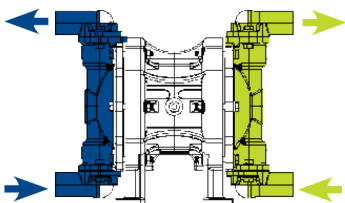

PUMPS

TP18 - TP30 - TP50
TP65 - TP100 - TP160
TP250 - TP500
TP700

MAIN APPLICATIONS

- Painting industry
- Wastewater technology
- Printing industry
- Paper processing
- Flexographic industry

Technical data

TWIN PHOENIX are mainly used in the textile and paper processing industry. These dual action pumps are able to transfer two different media independently and simultaneously. This is accomplished by using separate connections on the suction and discharge ports, keeping two pumped media isolated from each other, preventing unwanted mixing.
